

Sustainability

Our commitment to Water Conservation

Water ethics...

Without fresh water, life on land would not exist.

At Kwalata we are deeply aware of its importance. Our dedication to conserving this precious resource is reflected in our sustainable practices, innovative solutions, and educational outreach programs.

Sustainable Practices at Kwalata

- Our purified water is sourced from Magalies Water – Klipdrift Water Treatment Plant, which is situated on the Pienaars River, providing safe, clean drinking water from our taps.
- Grey water from Roodeplaat Dam Irrigation Scheme is used to irrigate our gardens
- We use biodegradable enzymes in our kitchen and laundry, minimizing water, ground and air pollution.
- We have implemented numerous practices to ensure that every drop of water is used wisely and efficiently.

Innovative Water-Saving Solutions

We encourage our guests to join us in our efforts by providing tips and resources on how they can conserve water during their stay. Simple actions, like re-using towels and taking shorter showers, can make a significant difference when practiced collectively.

The Kudos Culture at Kwalata

Our commitment to sustainability is supported by our unique Kudos4Kwalata culture. By fostering a positive and rewarding atmosphere, we ensure that our team remains motivated and dedicated to our water conservation goals.

Every Drop Counts

At Kwalata, we believe that every small effort counts and that together, we can make a significant difference. Our dedication to sustainable water management not only helps protect this vital resource, but also ensures a greener, more resilient future for generations to come. Join us in our mission to conserve water and create a more sustainable world.
